

Notice

Date: November 11, 2025

To: All 4th Year Computer Science Students

It is well known that you are enrolled in the course “Final Year Project I” in Semester I of the 2025/2026 academic year. The approved project titles are listed below.

NB: Groups whose titles were not accepted must submit three new titles by November 13, 2025.

Final Year Project Coordinator

Tadesse Kebede

Best regards,

S.No.	Group No.	Group Members	Advisor	Title	Additional Features
1.	Group-1	1. Melkias Teshoma: 0719 2. Andualem Argo: 014 3. Natnael Abebaw: 0840 4. Sifen Geremu: 0741	Mr. Asedo Sh.	The Language Practice and Exchange System (LPES)	Title Modification: Ethiopian Language Translator for HealthCARE Key Features: • Supports three languages: Aaf Somali, Amharic, and Afaan Oromoo • Medical Knowledge Base Training for healthcare-specific accuracy • Speech-to-Speech Translation for real-time communication • Adaptive Learning to improve translation quality over time • Medical Terminology Explainer using local languages for better understanding • Secure Communication through encryption and hash verification
2.	Group-2	1. Edlawit Kife :0350/15 2. Mikiyas Nega: 0742/15 3. Eyerusalem Sahle: 0389/15 4. Nejimiya Abdi: 0858/15 5. Abiy Biniyam: 0074/15	Mr. Kibru G.	1. CulinaryAI: A Smart Kitchen Assistant with Real-Time Recipe Adaptation Based on Inventory and Dietary Goals	New Title Assigned
3.	Group-4	1. Gutema Tonkolu: 0496/15 2. Ergama Golole 0376/15	Mr. Melaku A.	1. Comprehensive Web Platform for Student	Feature Area Required Features

		3. Kurabachew Dereje 0658/15 4. Wabi Girma 1026/15 5. Alemseged Muleta 0113/15		Freelance and Internship Management	Application & Task Management Track progress of applications and tasks; Approve, decline, or shortlist candidates; Assign tasks and manage deadlines; Automatic status updates (Pending → Shortlisted → Accepted/Rejected); Task approval workflow Job & Internship Posting Post and manage internships/freelance tasks; Include description, required skills, duration, stipend, deadlines; Edit/manage existing postings Search, Filtering & Recommendations Search and filter tasks by skills, duration, or stipend; Personalized recommendations based on student profiles and past activity; AI-based matching to opportunities Performance & Skill Tracking Monitor task completion and skill development; Provide feedback and ratings; Advanced analytics or skill progress dashboards Communication Messaging between students, recruiters, and supervisors; Feedback on applications and tasks; Chat notifications AI Features
--	--	--	--	---	---

					Resume/CV analysis and suggestions; Skill extraction and matching to relevant tasks or internships Multilingual Support Support multiple languages for better accessibility and usability
4.	Group-3	1. Abdulhakim Kemal 2. Lensa Kediri 3. Hayu 4. Ahmedin Remedan 0109/15 5. Mahadi Abdusalem 0690/15	Mr. Keno B.	Online Tutorial and Project Advising System for Haramaya University	Title Modification: Academic Project Advising System for Haramaya University Key Features: • Project Submission and Approval Workflow for structured project management • Automatic Advisor Assignment based on student preferences and advisor specialization • Milestone Management defined by project coordinators • Advisor Load Balancing to ensure fair distribution of student projects • Automated Reminders for project submission timelines and milestones • Collaboration Tools to support interaction between students and advisors • Messaging and File-Based Comment Compilation for efficient communication • Comprehensive Evaluation System with defined criteria and rating mechanisms • Integrated Version Control, Merging, and Refactoring Tools for code and document management • Final Version Submission to the appropriate academic body

5.	Group-5	1. Menna Ochan 0721/15 2. Elias Kemal 0882/15 3. Kidist Shambel 0642/15 4. Jerusalem Dereje 0589/15 5. Jibril Mohamed 0591/15	Mr. Alemu G.	AI-Powered Blind Communication For HU	Title Modification: AI-Powered Academic Assistant for Visually Impaired Students at Haramaya University Key Features: • Speech-to-Text and Text-to-Speech capabilities for seamless interaction • AI Modeling based on university life and academic context data • AI-Based Chat Interface for academic guidance and assistance • Multilingual Support: English, Amharic, and Afaan Oromoo • Command-Level Retrieval and Voice Dictation for efficient control and input • Smart Reminders for schedules, deadlines, and tasks • Accessible Web and Mobile Applications for ease of use
	Group-19			1. AI-Powered Online Examination System with Real-Time Proctoring 2. Digital meal card record 3. Health Record Information System for Rural Clinics	Rejected

6.	Group-6	1. Tinsaye Gezahegn 1005/15 2. Metsnanat Teshager 0736/15 3. Kebrom Kelelegn 1127/15 4. Nebil Abdo..... 0812/15 5. Eldana Tesfahun 0357/15	Mr. Tadesse K.	SmartTutorET- Smart Web and Mobile Learning Platform	Title Modification: SmartTutorET- Smart Web and Mobile Learning Platform for High School Key Features: • Peer Learning to encourage collaboration among students • Game-Based Learning for engaging and interactive education • Leaderboard System with predefined ranking criteria to motivate learners • Success Path History to track and showcase the learning journeys of top-performing students • One-to-One Tutoring for personalized academic support • Payment Integration for premium courses and tutoring services • Resource Sharing Platform for learning materials and study guides • Peer-to-Peer Video Connection for live discussions and group studies • Certificate Generation and Graduation Management for student achievement recognition • AI-Powered Learning & Tutoring – Chatbot tutor, adaptive learning, personalized study plans, grade prediction, and AI-driven feedback. • Smart Scheduling & Task Management – Timetable organization, reminders, to-do lists, calendar integration, and auto-sync with university systems.
----	---------	---	----------------	--	---

					• Learning Resource Hub – Digital library, lecture uploads, video tutorials, offline access, and AI-based resource recommendations. • Collaboration & Communication Tools – Discussion forums, peer groups, direct chat with tutors, advisor messaging, and virtual whiteboards. • Performance Tracking & Analytics – Progress dashboards, study time tracking, performance comparison, motivation stats, and achievements/badges. • Notifications & Alerts – Push notifications, motivational reminders, AI suggestion prompts, and optional email/SMS alerts. • Administrative Controls – Admin dashboard, instructor panel, user role management, and cloud backup/restore. • Advanced User Experience Features – Voice commands, multilingual support, dark/light mode, and cross-platform sync. • Offline Functionality – Offline access to materials and limited chatbot features without internet. • AI Emotional Support & Motivation – Detects stress, provides encouragement, and promotes mental well-being.

7.	Group-7	1. Umer Selahadin 1022/15 2. Yoftahe Yoseph 1065/15 3. Desalegn Derje 0316/15 4. Abdi Alemu 0010/15 5. Tesfatsion Tadesse 0994/15	Mr. Bahar H.	Local Artisans Marketplace – A Full-Stack Web Application	Title Modification: Web-Based Harar City Artisans Digital Broker – Marketplace Key Features: • Offer & Promotion Management • Discount Packages and promotional offers to attract buyers Artisan Features • Profile Creation & Management: Add bio, location, skills, and contact information • Product Listings: Upload product images, descriptions, prices, and availability • Inventory Tracking: Monitor stock levels and update availability in real time • Order Management: View and process incoming orders, update statuses, and manage deliveries • Sales Analytics Dashboard: Track earnings, best-selling products, and customer feedback Buyer Features • User Registration & Login: Secure sign-up and authentication • Product Browsing & Search: Filter by category, artisan, price, or location • Shopping Cart & Checkout: Add items to cart, review orders, and confirm purchases
----	---------	---	--------------	--	--

					• Payment Integration: Support for Telebirr, CBE Birr, bank transfers, and cash-on-delivery • Order History & Tracking: View past purchases and current order statuses • Ratings & Reviews: Leave feedback on artisans and products Broker / Admin Features • Dashboard Overview: Monitor platform activity, user statistics, and sales metrics • Artisan Verification: Approve or reject artisan profiles and product listings • Dispute Resolution Tools: Manage complaints and transaction issues • Commission Management: Set, calculate, and track broker fees or commissions • Artisan License Verification: Validate artisans' credentials and business licenses General Platform Features • Responsive Design: Optimized for both web and mobile devices • Secure Authentication: Password hashing, session management, and role-based access control • Notification System: Email or SMS alerts for orders, promotions, and messages • Accessibility Compliance: Basic support for screen readers and keyboard navigation • AI-Powered Recommendations: Suggest products based on user preferences and behavior
--	--	--	--	--	---

					• AI-Based Descriptive Search: Find products using natural language or visual search • Geolocation Filtering: Display nearby artisans and localized delivery options • Live Auctions: Enable real-time bidding for artisan products • Mobile-Friendly Interface: Seamless performance on smartphones and tablets
8.	Group-8	1. Yemisrach Habtamu....1059/15 2. Nuhamin Leul.....1776/15 3. Yordanos Sidelil.....1079/15 Beamlak Fekadu0194/15	Mr. Moyka D.	Web-Based Mental Health Chat-bot	Title Medication: Mental Health Support System Key Features: • Syndrome and Anxiety Level Classification: AI-assisted assessment of users' mental health conditions • Counselor Registration: Secure onboarding and profile creation for registered counselors • Therapist Registration: Verified therapist profiles with license validation • Client Registration: Simple and secure user registration and profile management • Client–Therapist Matching: Automated pairing based on client needs, specialization, and availability • Appointment Scheduling: Easy booking and management of counseling or therapy sessions • Video Communication: Secure video calls between clients and mental health professionals • Payment Integration: Support for multiple payment methods for session fees

					• Web and Mobile Application: Accessible on both desktop and mobile platforms
	Group-18	1. Alpha Guyasa Ugprt 5756/15 2. Abdi Fekeda — Ugpr 0016/15 3. Kenesa Asfaw Ugpr 0628/15 4. Milkessa Eshetu Ugpr 0743/15 5. Fethiya Muhajir Ugpr 0421/15		1. CyberTrace Scan: A Hybrid AI Platform for Automated Penetration Testing	Minimum features of the system: ☐ User authentication and management ☐ Automated Vulnerability Scanning: • SQL Injection testing • Cross-Site Scripting (XSS) testing • Broken authentication detection • Directory and file enumeration • And other vulnerability types ☐ AI-Assisted Analysis: • Machine Learning model to classify findings as true or false vulnerabilities • Assigns severity levels (High, Medium, Low) based on risk scoring ☐ Reporting • The report shall include: Vulnerability name, description, affected URL, severity level, proof-of-concept, and recommended fix ☐ User Interface: • Dashboard to manage scans, view progress, and track results

9.	Group-9	1. Husniya Mahdi : 0557/15 2. Lensa Tesfaye: 0674/15 3. Nebiya Jemal: 0844/15 4. Ket Girma 0631/15	Mr.Kibru G.	Sentinel AI: Intelligent Threat Detection System Using MERN Stack and Machine Learning	Title Modification: Haramaya University Sentinel AI: Intelligent Threat Detection System Using MERN Stack and Machine Learning - Machine Learning based threat analysis - Confidence Score and categorization of the threat - Alert and notification system - Suggest corrective measures of threats - Reporting of the threats on dashboard - Detect the threat using algorithms - Threat classification - Area based visualization of the threat
10.	Group-10	1. Musa Amano.....0804/15 2. Jemberu Gule.....0587/15 3. Deme Regassa.....0308/15 4. Abdulmenan Hussein...0042/15	Mr.Abdulaki M.	OBV Vehicle exit Management system	Title Modification: Haramaya University Vehicle Management System Key Features: - Car Information Management - Car Request Management: Class-based request pool and service-based assignment - Complaint Management System (for Vehicle Pooling) - Fuel Management - GPS-Based Car Tracking: For fuel consumption estimation - Notifications: For drivers and users - AI-Based Exit Tracking - Reporting and Documentation - Car Availability Checking
	Group-16	1. Abreham Beyene...0082/15 2. Abubeker Misbahu...0085/15 3. Mohammedabdulaziz...0775/15 4. Geletaa Sisay...0476/15		Smart Property and Asset Marketplace	Title Modification: Dire Dawa Real Estate Management System Key Features:

		Arefat Zeyne...0160/15		Integrating AI and Interactive Maps	• Legal and Financial Transactions: Secure management of property-related payments and documentation • Physical Property Verification: On-site and digital verification of listed properties to ensure authenticity • Broker Management: Registration, tracking, and performance monitoring of real estate brokers • Location-Based Pricing: Dynamic pricing based on property location and proximity to essential services • User Preference Management: Personalized property recommendations based on user interests and history • AI-Powered Price Recommender: Suggests optimal property prices for owners using current market trends • Comprehensive Real Estate Management: End-to-end handling of listings, clients, and property details • Periodic Payment Module: Supports installment or recurring payments for buyers and tenants • Commission and Bonus Calculation: Automated computation for agents and brokers • Legal Registration Module: Facilitates legal documentation and property ownership verification • Fraud Detection and Alerts: Identifies suspicious activities and alerts administrators or users
--	--	------------------------	--	-------------------------------------	---

					3D Property Visualization: Interactive 3D models for virtual property tours and presentations
11.	Group-11	1. Maru Mardikios 0703/15 2. Zinabu Addisu 3768/14 3. Yosef Aymalo 1085/15 4. Tolawak Mengistu 1011/15	Mr. Kidane W.	Web-Based Crop Diseases Detection System Using Deep Learning	Key Features: - Local Data Utilization: Train models using locally collected agricultural datasets for higher accuracy - Local Language Interaction: Support for communication and output in regional languages for ease of use - Interpretable / Explainable AI: Provide transparent model insights to help users understand prediction outcomes - Mobile-Based Access: Enable farmers and agricultural experts to access the system via smartphones - Weather Data Integration: Combine environmental and weather information to improve disease prediction accuracy - Treatment Procedure Visualization: Display recommended treatment steps with visual guides - Alert System: Notify users about detected diseases and potential outbreaks in real time - Recommender System: Suggest appropriate treatments, fertilizers, or preventive measures - Severity Level Classification: Indicate how serious a detected disease is for better decision-making - Algorithm Comparison: Implement and compare at least two deep learning algorithms for performance evaluation

					Multi-Disease Detection: Support detection of at least two or more diseases for each crop type
12.	Group-12	1. Bonsa Tujo 0225/15 2. Selehadin Nesredin 0920/15 3. Tsion Zekariyas 1019/15 4. Muaz Abraham 1119/15 5. Nebiyu Kille 0846/15	Miss.Etsub T.	1. Rentify – An All-in-One Rental Marketplace 2. Web-Based Computer Lab Monitoring and Management System (Haramaya University) 3. AI-Enhanced E-Commerce Website	Rejected
	Group-17	1. Nihan Wemaye 0915/15 2. Abdulaziz Mustafa 0030/15 3. Abdusetar Mohammed 0053/15 4. Behailu Birhanu 0199/15 5. Eyuel Eyasu 0393/15		Online Auction Platform	Key Features: - AI-Based Fraud Detection: Identify and flag abnormal bidding patterns to prevent manipulation - Smart Contract / Blockchain-Enabled Escrow: Ensure transparent and secure transactions - AI-Powered Recommendation System: Provide personalized bidding suggestions to users - Local Language Support: Full support for Amharic and Afan Oromo for better accessibility

					• Data Analytics Dashboards: Track bidding trends, user behavior, and platform performance in real time • Real-Time Notifications: Keep users updated on bid status, auction events, and platform alerts • Virtual Assistant Auctioneer: Assist users in navigating auctions, placing bids, and answering queries • Seller and Buyer Verification: Authenticate users to ensure platform security and trustworthiness • Blacklisting of Fraudulent Users: Block fake auctioneers or suspicious participants from the platform • Payment Integration: Support multiple secure payment options for seamless transactions • Bidder Information Encryption: Protect user data and bid amounts until the auction concludes
13.	Group-13	1. Mickyas Alemshet 5755/15 2. Addis Negash 0090/15 3. Dawit H/Mariyam 0299/15 4. Firdos Kedir 0435/15 5. Abinet Israel 0075/15	Mr.Medan Z.	A Web-Based Internship Marketplace for Students, Companies, and Universities	Key Features: • Account Verification: Secure registration and authentication for students, companies, and universities • Student–Advisor Communication: Facilitate interaction between students and their academic or company advisors • Student Progress and Attendance Tracking: Monitor internship participation and performance • CV Data Extraction and Matching: Apply algorithms to screen CVs, recommend best-

					fit candidates, and integrate personal identification and social media data • Assessment Management: Evaluate interns' performance and generate structured feedback • Status Notifications and Tracking: Keep students and companies updated on internship progress and milestones • Advisor Assignment and Communication: Assign institution and host company advisors and enable direct communication • Milestone Specification: Define tasks and objectives for students throughout the internship • Integration of Students and Companies: Streamline connections between interns and host organizations • Certification and Graduation: Issue completion certificates and formal recognition upon internship completion
14.	Group-14	1. Firaol Bayisa 0430/15 2. Firaol Birhanu 0433/15 3. Firaol Mustefa 0427/15 4. Birmachis Mulugeta 0240/15 5. Nesredin Jeilan 0878/15	Mr. Gadisa A.	Environmental Impact Analyzer	• Title Modification: Weather Condition Prediction Using Machine Learning: A Case Study of Eastern Hararghe • Key Features and Objectives: • User Account Management: Allow users to register, log in, and manage forecast preferences • Weather Dataset Access: Enable users to upload or access historical and real-time weather datasets • Machine Learning-Based Prediction: Apply ML algorithms to forecast future weather conditions accurately

					• Interactive Visualization: Present predictions using charts, graphs, and maps for easy interpretation • Extreme Weather Alerts: Generate warnings for heavy rainfall, floods, storms, and temperature extremes • Early Warning System: Provide timely notifications to minimize risk and enhance preparedness • Exportable Reports: Allow users to export weather forecasts and reports in PDF format • Prediction Accuracy Improvement: Reduce prediction errors by at least 50% compared to traditional methods • Web and Mobile Accessibility: Provide real-time weather forecasts accessible on multiple platforms • Recommendations Based on Predictions: Offer actionable advice and alerts based on forecasted weather events
